Neuro Linguistic Programming (NLP) explains the relationship between how we think (Neuro), how we communicate both verbally and non verbally (linguistic) and our patterns of behaviour and emotions (programming). Essentially, NLP can be described as how to consistently achieve specific desired outcomes in both business and personal situations.

## Where can I use NLP?

NLP can help individuals with challenges large and small in life, whether they are to overcome problems or increase performance. NLP can help you change or eliminate behaviours as you desire, choose your mental, emotional and physical state at any time!
